The Last Server You'll Ever Buy?

Earlier this year, one of our long standing clients made the decision to virtualize their environment. They not only wanted to replace their aging hardware to increase the reliability of their network, they also wanted to experience minimal downtime. To achieve this, they needed to have a redundancy plan in place.

After thorough planning, hardware and licensing research and in depth evaluation by Agility's team a virtual solution was suggested and swiftly implemented using VMware. The virtual approach made this client's newly upgraded network easily scalable. Now they are able to seamlessly add and/or remove servers while using less energy. This client's need to purchase additional physical servers - pun intended - virtually vanished!

As a result, our client saved thousands of dollars over the long term and they now have a more efficient, robust, scalable environment and virtualization gave our client the added benefit of being greener.

You Asked For IT - Office365

In essence, it's identical to your current Microsoft Office environment, it just takes your existing Office Suite and puts it in the cloud for easy remote access. Officially launched in June of 2011, Office 365 services include access to a cloud-based version of Exchange, SharePoint, and Office 2013 Web Apps (web-based versions of Microsoft Word, Excel, PowerPoint and OneNote).

Highlights:

- Access from anywhere
- Rich Outlook functionality
- Low monthly cost
- Business-class security
- Robust calendaring
- Host online meetings
- Easy for teams to collaborate on documents

With the advent and onslaught of cloud offerings, e.g., Google Apps and Intermedia, Microsoft entered the arena with a cost effective way to tap into our world - the small business segment - with their own always-up-to-date cloud Service.

Have you met the new guys?

MIKE KOLB - MCITP, dCAA, dCCE, A+, Net+
SENIOR NETWORK CONSULTANT

Mike has several years of technology consulting in addition to many years of accumulative I.T. experience. He has spent many years architecting leading projects as a senior level consultant focusing on technology and problem solving. Mike has extensive expertise in numerous Microsoft OS platforms.

DAVID BIEWER
ASSOCIATE NETWORK CONSULTANT

David has great passion for delivering customer service and brings to Agility 7 years of versatile systems administration experience. His expertise includes both desktop and server support deployment, as well as MS productivity tools. David is a highly motivated individual driven to fulfill customer satisfaction.
